

# **SELSAT > IP**™

## **World First SAT>IP** **Flat** Satellite Antenna

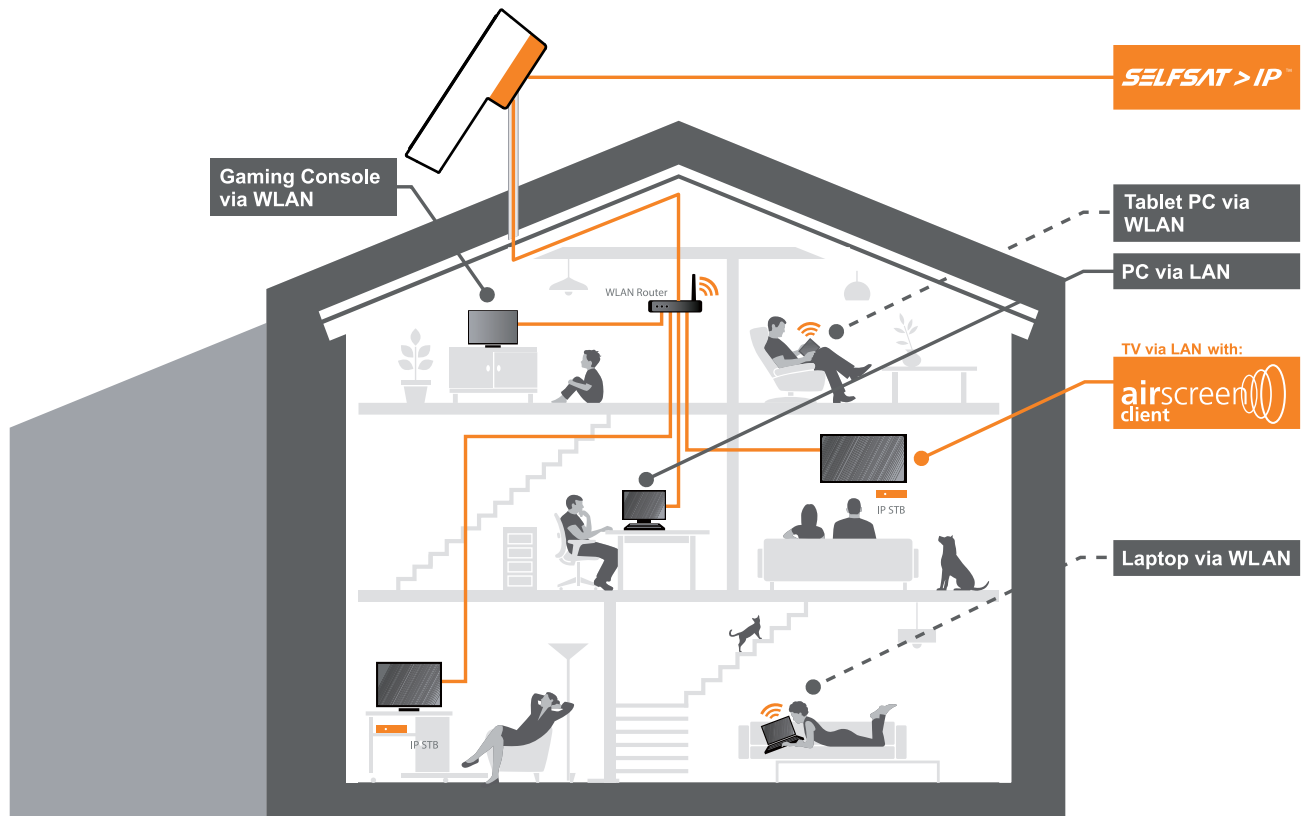

SELSAT>IP38

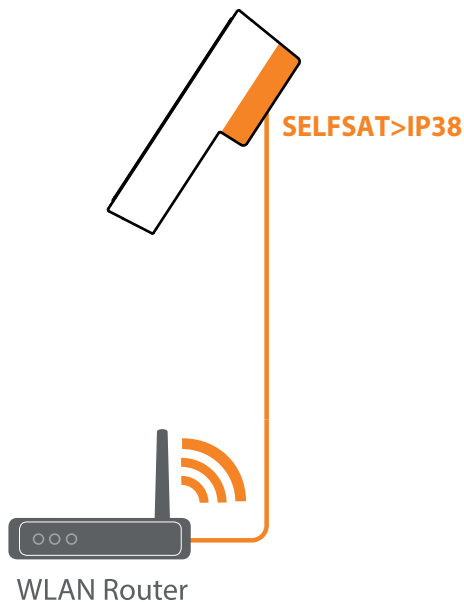

**8 different channels**

- **Slim and compact (optimum solution for SAT>IP)**
- **Supports 8 different Smart devices simultaneously (Smart TVs, Tablets, Smartphones, PCs)**
- **2 legacy outputs for conventional DVB-S/S2 receiver**

## Home usage scenario diagram

## Setup diagram

| MODEL                                          | SELFSAT>IP38                                             |
|------------------------------------------------|----------------------------------------------------------|
| Input Satellite Frequency                      | 10.7~12.75 GHz                                           |
| Polarization                                   | Vertical & Horizontal                                    |
| Antenna Gain                                   | <b>33.7 dBi @ 12.7 GHz</b>                               |
| Size(WxDxH)                                    | 515×275×60mm                                             |
| Weight                                         | 4.5kg                                                    |
| Simultaneously Operating Channels              | 8 Channels                                               |
| Operating Temperature                          | -30°C~+60°C                                              |
| LNB Output                                     | 2 legacy<br>1 standard Ethernet cabling (Cat5e or above) |
| LNB Output Frequency                           | 950~2150 MHz                                             |
| L.O. Frequency                                 | 9.75GHz / 10.6GHz                                        |
| LNB Supply Power (PoE IEEE 802.3af-2003)       | 48V +/- 10%                                              |
| LNB Power Consumption (Class 3, PoE PD device) | 9W (typ), 12.95 W (max)                                  |

SELFSAT>IP lets you watch satellite broadcastings with your smart devices using Wi-Fi.
